F&B BUSINESS MANAGEMENT

Katsu Zushi

One Integrated Platform for **Smart** F&B Operations

Inventory Automation | Expiry Prediction | Supplier Comparison | Financial Reports

The Problem

Restaurant operations are fragmented, manual, and wasteful

Manual Inventory Errors

Stock counted by hand leads to shortages, over-ordering, and inconsistent unit conversions across different pack sizes

Food Waste from Poor Expiry Tracking

No batch-level tracking means ingredients expire silently. FEFO rotation is impossible without knowing which batch expires first

No Supplier Price Comparison

Purchasing from one supplier blindly means missing savings. Without comparable unit pricing, fair comparison is impossible

Fragmented Financial Data

Sales, costs, and expenses tracked separately means no real-time profit visibility. COGS is a guess, not a calculation

30%

of F&B food costs

are lost to waste, over-ordering, and inefficient supplier selection across the industry

These 4 problems are interconnected — solving them requires one unified system, not 4 separate tools

Our Solution

One integrated system. Four interconnected features. Zero data silos.

01

Automatic Inventory

Recipe-based auto deduction from daily sales. Unit conversion across pack sizes. FEFO stock rotation.

02

Expiry Prediction

Batch-level expiry tracking with shelf-life estimation. 7-day & 1-day warning thresholds before food waste happens.

03

Supplier Comparison

Fair unit-price comparison across suppliers. Cheapest supplier identification. Historical price tracking.

04

Financial Reports

COGS, gross & net profit, expense breakdowns. Menu item profitability ranking. Weighted average costing.

One Data Store

All 4 features share the same persistent JSON storage. Inventory feeds expiry. Expiry feeds financials. Supplier data feeds everything.

Zero

data silos

Smart Inventory & Expiry Tracking

Recipe-based deduction · FEFO rotation · Batch-level expiry prediction

Daily Sales
Menu items sold

→

Recipe Match
Ingredient qty per serving

→

FEFO Deduct
Earliest expiry first

→

Updated Stock
Real-time balance

48
Ingredients tracked

50
Batches with expiry

84
Transactions logged

Expiry Warning System

- Expired — Immediate removal alert
- 7-day warning — Shelf life > 7 days
- 1-day warning — Shelf life ≤ 7 days

Supplier Price Comparison

Fair unit-price comparison across all suppliers · Cheapest supplier auto-identified

Cheapest Supplier Scorecard

1	**Nippon Restaurant Supplies** Cheapest for 16 ingredients	16
2	**Sunrise Foods** Cheapest for 15 ingredients	15
3	**Global Provisions Inc** Cheapest for 14 ingredients	14

Direct Savings Examples

Raw Salmon
Sunrise: RM 0.0405/g
Global: RM 0.0425/g
4.7% saved

Raw Yellowtail
Nippon: RM 0.0561/g
Sunrise: RM 0.0575/g
2.4% saved

Sushi Rice
Nippon: RM 0.00255/g
Global: RM 0.00260/g
1.9% saved

Soy Sauce (3 suppliers)
Sunrise: RM 0.0140/ml
Nippon: RM 0.01428/ml
2.0% saved

Financial Reports & Net Profit

COGS · Gross profit · Operating expenses · Net profit margin · Menu profitability

Cost of Goods Sold

Recipe-based consumption cost using weighted average pricing. Never treats entire PO as expense.

Expense Tracking

9 categories: rent, salaries, utilities, packaging, delivery, marketing, equipment, cleaning, transport.

Menu Profitability

Per-serving cost vs selling price. Gross margin ranking. Identifies high and low profit items.

Period Comparison

Weekly, monthly, annual, or custom date range reports with trend analysis.

Financial Summary (Mockup)

Gross Sales	**RM XX,XXX.XX**
Less: Discounts & Refunds	- RM X,XXX.XX
Net Sales Revenue	**RM XX,XXX.XX**
Cost of Goods Sold	- RM X,XXX.XX
Gross Profit	**RM X,XXX.XX**
Operating Expenses	- RM X,XXX.XX
Net Profit	**RM X,XXX.XX** XX.X% margin

Ready: Sales data + PO costs + expense records are already stored. Reports generate automatically once sales data is processed.

Key Results & Business Impact

Real data from 3 processed Purchase Orders · System fully operational

48

Ingredients

Tracked with units, pack sizes & costs

50

Batches

With estimated expiry dates

3

Suppliers

50 price records compared

84

Transactions

Stock movements logged & auditable

4 ingredients have multi-supplier comparison with direct savings identified · **All data** from real processed POs, not sample data

Thank You

Katsu Zushi Business Management System

One platform. Four features. Zero data silos.
